

Strategic Plan 2024 - 2028

Who We Are ANZCHOG is the peak body and cooperative clinical trials group for children's cancer in Australia and New Zealand.

Our Vision World class care for children and adolescents with cancer and blood diseases.

Our Mission We strive for excellence in clinical trials and care, research, professional education and advocacy.

Our Objectives and Strategies

Strengthen foundations of clinical trials and research.	Build an inclusive and collaborative community.	Engage in cohesive and dynamic advocacy for the sector.	Create a robust and sustainable organisation.
Build home-grown multi-disciplinary clinical trials.	Support and acknowledge all roles and disciplines.	Consult with sector experts to influence national policy.	Diversify funding sources to ensure sustainability.
Facilitate participation in, and leadership of, international clinical trials.	Strengthen communication and brand visibility.	Advocate for significant issues of importance to our members, and stakeholders.	Tailor our governance to enable our strategies.
Driving collaboration on biobanking and data.	Education and professional development for all members.	Increase public awareness of issues facing the sector.	Invest in our team.
Facilitate mentoring programs for members.	Grow opportunities for member involvement in activities.	Grow involvement of families and carers.	Build strategic partnerships with aligned groups.

Our Five-Year Ambitions

Increase our membership base and enhance engagement and collaboration with members in at least five new educational and professional development initiatives.

Lead at least one roundtable each year on policy issues bringing sector experts to the table.

Increase the number of 'clinically impactful' trials that are open.

Secure diversified funding to support both peak body and clinical trials group roles.

Achieve a tangible increase in awareness and visibility of ANZCHOG within and beyond the sector.

Actively involve consumer groups and those with lived experience in our activities.
